

CRM system by Softile Limited

CRM

CRM is designed for detailed resource planning, monitoring human capabilities, and daily tracking of executed tasks with pipeline processing. It's a tool that helps companies efficiently manage their resources, monitor task completion, and optimize workflow processes. CRM can be valuable in various fields, including project management, personnel management, production operation monitoring, and more.

Softile Limited

The main functionality of the CRM includes, but not limited to:

1. Employee and Contractor Database ("Team Member"):

- Information Repository: Hover serves as a comprehensive database housing essential details about employees and contractors.
- Data Provision: It facilitates the seamless retrieval of pertinent information regarding these individuals.

2. 2-Factor Authorization:

- Schedule-Based Authorization: Hover incorporates a 2-factor authorization system, which is structured around predefined schedules.
- Optional Manager Confirmation: In addition to the schedule-based authorization, there is an optional layer where manager confirmation can be implemented for added security and validation.

-

These features collectively empower organizations to efficiently manage their workforce, ensuring easy access to employee or contractor information, while also bolstering security through 2-factor authorization, with the flexibility to involve managerial confirmation as needed.

Dashboard of the existing tasks:

- Ability to manage managerial positions;
- Security checks on employees;
- Ability to structure employees for dismissal/return to work;
- Employee payrolls;
- Ability to set up work shifts for employees;
- Functionality for setting up a Telegram bot;
- Ability to feedback;
- Create a knowledge base;
- Store and manage contact data;
- Penalties;
- Vacation schedule;

Functionality for training new employees:

- List of employees who are training/graduated;
- Employee/team tests;
- Training program;

Security Service:

- All employers;
- Candidates for review;
- Polygraph;

Minimal requirements for computing software:

- CPU Model Name: Intel Core Processor (Skylake IBRS, NO TSX)
- CPU MHz: 2.80GHz
- CPUs: 4
- Threads: 8
- RAM: 8Gb
- HDD(NvMe): 200Gb
- Software Operating System: GNU/Linux Debian (11 or higher), CentOS (version 7 or higher), Ubuntu (20.04 or higher)

Minimal requirements for database host:

- CPU Model Name: Intel Core Processor (Skylake IBRS, NO TSX)
- CPU MHz: 2.80GHz
- CPUs: 4
- Threads: 8
- RAM: 6Gb
- HDD(NvMe): 100Gb
- Software Operating System: GNU/Linux Debian (11 or higher), CentOS (version 7 or higher), Ubuntu (20.04 or higher)
- Database name: MySQL

Roles in the system

CTO

The screenshot shows a web application interface for an 'Employee Panel'. On the left is a navigation sidebar with the following items: 'Personal office', 'Statistics', 'Workers', 'Employees on layoff' (with a blue badge '19'), 'Employees for renewal' (with a blue badge '7'), 'My fines', 'In Documents for signature', 'Reporting', 'Vacation schedule', 'Attributes', and '2 Applications for training'. The main content area is titled 'Employee Panel' and 'Personal office'. It displays the name 'TESTCTO TESTCTO null' and a status 'Status: Employee (STO)' with a green dot. Below this is a profile picture of an orange cat. To the right of the photo is a list of attributes: 'Change' (Flexer2.0), 'City' (Zhytomyr), 'Phone number' (+38(345)465-67-56), and 'E-mail' (testcto.testcto1@zd.hoverua.com). At the bottom of the panel, a light blue banner contains the text 'TESTCTO null, welcome to your personal account!'.

This role includes:

- Personal office
